

## Company Overview:

Elevate Health Sciences manufactures nutraceutical and over-the-counter products with rigorous standards for quality and consistency.

## Mission:

Elevate's mission is to become the world's leader in creating innovative, sustainable, clean label and personalized supplements.

## Products & Services:

Customer-centric approach to manufacturing a variety of nutritional supplements and over-the-counter products.

Employs an innovative, in-house research and development team that helps develop, design and formulate products to drive business growth for customers; Elevate has created or co-developed nearly half of the products it manufactures.

Regularly invests in specialized equipment to produce leading-edge products, provide scaling for new product innovation and drive efficiencies for lower price.
